

Empowered Internet Solutions, LLC (EIS) located in the Pacific Park Plaza. EIS opened its doors in September of 2005 and since has grown to be Hawaii's largest web solutions provider empowering more clients in the state of Hawaii than any other web design company.

EIS is a proud member of The Zeppo Network, the leading provider of innovative web management software specifically designed to empower individuals and businesses of all sizes to take full control of their own web presence. EIS also provides managed web services for companies without the time or manpower to set up and maintain a professional web presence on their own.

## FEATURED CLIENT

"Since our website **www.Models.Net** has been running for ten years, technology and software has changed so greatly that our site needed a major overhaul. Rob and the team at **Empowered Internet Solutions** implemented design and function capabilities that we didn't have before. They seemed to understand immediately what the site needed to do, and also came up with ideas that we had not thought of ourselves. We've talked with several web design companies and there is **no other company in Hawaii** that could've handled the complexities of re-building our site. Our site now better suits our current needs so we can manage our data and files easier to accommodate a more global market.

The exciting part about our new site is that we can now make text and design changes as we need. We used to have to rely on a webmaster who took several weeks to make minor changes when it fit his schedule. We can now make changes as we need on a daily or weekly basis to fit what's currently happening in our business. The movie and modeling industry changes constantly and new projects come up all the time. We can now keep up with it so easily with **Empowered Internet Solution's** user-friendly software.

The bottom line is that it'll be easier to do business. Managing the new site will save us time that we can now spend in other areas to be even more successful. We are building other sites with Empowered Internet Solutions and are excited about our new **'empowerment.'**"

MODELS.NET is a unique company providing aspiring models and actors of all ages around the world with necessary portfolio exposure. This exposure can help you get started in Print, Fashion, TV, Movies, Commercials, Promotional and much more.
