Empowered has averaged over 15 new clients a month since day one, while providing each client with cutting-edge designs, not constrained by cookie-cutter templates.

“We are recognized as the leaders in innovative design concepts. We attribute this monumental feat in part to our flagship product, ZeppOS,” said Bertolf.

Two and a half years ago, Empowered launched ZeppOS, a hybrid content management system, which allows clients with little or no technical background to update their websites directly from the internet, revolutionizing the way websites are built and maintained.
